Scaffolding sheet/ Stepping through protection

- Condensation protection
- Scaffolding protection
- Stepping through protection
- Easy mounting

# CONDENSATION SHEET

Scaffolding sheet/ Stepping through protection

## Product Specification

Condensation Sheet is made of HD\* polyethylene reinforcement, laminated on one side with LD\*\* polyethylene.

It is used as Stepping Through Protection when the vapour barrier function is not needed.

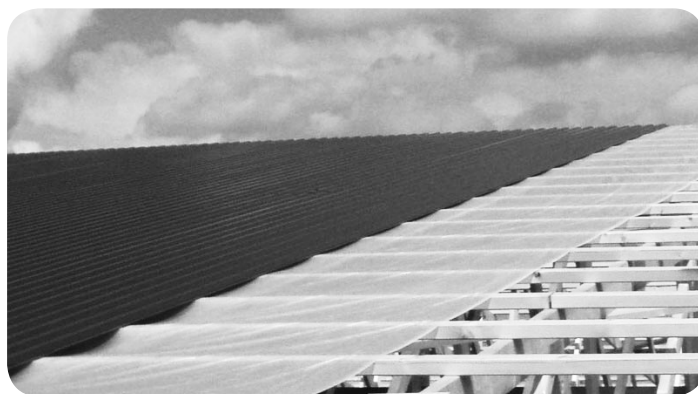

It can also be used as Scaffolding sheet or as a Condensation Sheet under the roof surface layer. (see pictures below)

\*High-density \*\*Low-density

## Technical Information

Characteristics	Value	Unit
Width	2730	mm
Length	50	m
Weight	90 (approx.)	g/m <sup>2</sup>
Thickness	0,12	mm
